<ul style="list-style-type: none">• Redesigned and improved the company website by adding a splash page and upgrading its search feature• Built the blog site for Auloni Magazine featuring weekly articles and events	

PROJECTS

E-commerce Phone Store

- React application that features a store where users can buy phones by adding them to the shopping cart
- Utilized Context API for state management in adding, editing and removing items to the cart

Spotify API Web Browser

- Developed a full stack application using Angular and Nodejs to create a Spotify Web browser
- Implemented a search functionality taking in user input and displaying the data on artists, albums, and playlists utilizing the Spotify Web API

Calendar Mobile App

- Built a mobile app using Java in Android Studio to generate a calendar that users interact with
- Implemented multiple features that allow users to add, edit, delete, and view their events based on the selected date
